DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a method of treating scleroderma using an inhibitor of PDE2.
 - II. Claims 6-30, drawn to a method of treating scleroderma using a compound of the claimed formula.
 - III. Claims 31-37 and 40, drawn to a method of inhibiting activated macrophages using an inhibitor of PDE2.
 - IV. Claims 38-39, drawn to a method of treating scleroderma via inhibiting PDE2.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Because not all PDE2 inhibitors has the chemical structure of claimed formula(different subclass), the claimed subject matter is patentably distinct. PDE2 inhibitor has multi-functions, it is used for not only scleroderma treatment but also other disorders(e.g. neoplasia, wound treatment, etc) as evidenced by US2002009764.

Inventions I (or II) and III are unrelated because scleroderma treatment is achieved by different biological pathway other than inhibition of PDE2 or inhibiting

activated macrophages as evidenced by US6444681(i.e. inhibition of adrenergic receptor using adrenergic receptor antagonist) US 5922755(i.e, inhibiting cell adhesion).

1.

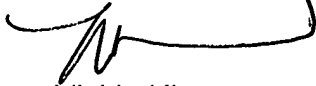

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for each group is not same, wherein a reference which anticipates the invention of Group I would not render the invention of Group II-III or IV obvious, absent ancillary art, restriction for examination purposes as indicated is proper. Even if there were unity of classification, the search of entire groups and/or genus in the non-patent literature(especially, non-patent literature) and database search (a significant part of a thorough examination) would be burdensome, it is undue burden for examiner for the accurate and proper examination, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vickie Kim whose telephone number is 703-305-1675. The examiner can normally be reached on Tuesday-Friday. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marianne Seidel can be reached on 703-308-4725.
